

# CASE STUDY

## Worcester business school

### Student hosting

*"Our experience with Education Host has been extremely positive. The level of service is outstanding, with some problems being resolved in hours or even minutes. Students are very satisfied"*

*- Dr. Joanne Kuzma*

## Managed Student hosting

### Executive Summary

The computing department of the Worcester business school were looking for a reliable, affordable web host to implement and manage up to 1200 student hosting accounts.

### Challenges

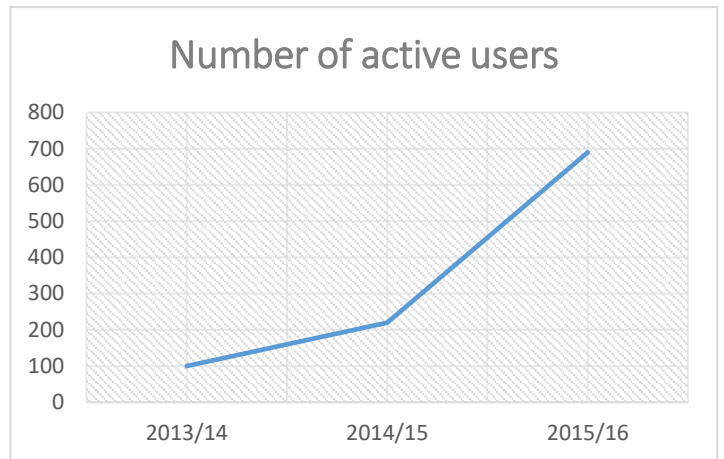

After attempting to use free hosting sites for hosting the university ran into several problems, such as lack of support, limited capabilities and commercial banners.

The technical requirements included cPanel for students, domain name for students, automation, out of hours support for staff and students and failsafe options in the event of downtime.

# Managed Student hosting

## The requirement

The University of Worcester and Education host discussed requirements for the first year of service. The main requirement was that each student had their own public web space, with a domain name that could be used for assignments. This included technical requirements (such as security and size), Number of students, costing and support. After year two, a further requirement for restore testing and frequency of backups was required to minimize risk.

*“Satisfaction can be demonstrated with the growth of the number of Students, rising from 100 to 600+ in 2015/16”*

*- Dr. Joanne Kuzma*

## Outcomes

Education host used its years of expertise in this field to create a custom package for the University of Worcester. Including web design, the hosting of up to 1200 student accounts, fully managed servers and guaranteed support within 24 hours for both students and lecturers with prices around 50% cheaper than that in industry.

Education host has been responsive in changing the required solution as the university added more modules, and more students. Implementing automation software to make this as easy as possible for the students, including automatic account removal after the student finished their time at University.

Dr. Joanne Kuzma says that *“Our experience with Education Host has been extremely positive. The level of service is outstanding, with some problems being resolved in hours or even minutes. Students are very satisfied”*.
